

# KEEP THE PRESSURE DOWN WITH EHP

High blood pressure is a serious health condition. It raises the risk of more significant health problems such as stroke, heart disease and loss of eyesight.

EHP is committed to helping members control their blood pressure, so we provide coverage for blood pressure monitors for **all EHP members**. To order a monitor, members can simply give their provider the following information.

## Provider Instructions:

- Contact:  
Johns Hopkins Pharmaquip  
Phone: 410-288-8150  
Fax: 410-282-8455

- Request **Procedure Code A4670 – Automatic Blood Pressure Monitor**
- An order from a health care provider is required

Monitors may be fulfilled by other DME providers, but EHP has negotiated preferable rates with Johns Hopkins Pharmaquip to reduce plan and member costs. Members should check their benefits for their specific coverage and copay amount.

\*If the standard model agreed to by EHP and Johns Hopkins Pharmaquip is not available, a similarly equipped model will be substituted. If your patient requires an upgraded model, additional charges may apply.
